

Just when you thought there's no more fast money—easy money—to be made playing independent E&P companies in the oil patch—PAY DIRT!

The **BIG** Canadian **MONEY** Bonanza: **GIANT OIL & GAS** (OTC: GGSIF)

It's the Perfect Mega-Growth Pick: Its asset value will jump well above **\$400 BILLION** over the next three years—yet the stock is currently trading at less than \$3 a share!

“Our 100%-owned Suffield Project... sits within an area of gas fields covering several thousand square kilometers, with more than 50,000 wells currently in production.”

-- Rob Sandhu, President, Giant Oil & Gas

It's the Perfect Mega-Take-Over Pick: 6 companies ringing its land in Alberta, Canada—already snapped up at a price tag of over \$6.5 BILLION...

“The source of the most significant series of light oil discoveries in the past five years.”

-- Tristone Capital

It's the Perfect Mega-High Demand Pick: Sits in the middle of 7.8 BILLION barrels of prized light crude—the gas-guzzling nations of the world are absolutely drooling...

“Analysts worry global demand for oil is so intense that supplies may not keep pace.”

-- Dow Jones MarketWatch

It's the Perfect Mega-Quick-Profit Pick: Big Oil is scrambling to buy up reserves—because the IEA says U.S. demand will grow by 2.2 million barrels a day next year...

"This comeback in oil is absolutely amazing."

-- Phil Flynn, VP, Alaron Trading

“\$100 a barrel is nothing compared to what’s just around the corner....”

From the Desk of: Colin McCabe
Editor, Elite Stock Report

Dear Investor:

This urgent alert will be short and to the point—so sit up—you don’t have time to get comfortable. **AND DON’T READ THIS LATER—READ IT NOW!**—or you’ll cry like a baby when you see all the money that just slipped through your fingers!

And forget about the stock market and all useless fear-mongering recession-talk. I don’t give a damn whether the DOW is down or up 300 points, or if Bernanke will lower interest rates, or not. It doesn’t matter—not when it comes to this stock: GGSIF.

So snap out of it, pay attention, *please!* I don’t give away freebies very often. Okay, here’s the short and sweet of it (the in-depth story is further below):

- This company, through luck or design (I don’t care which), is sitting in “Oil Nirvana”: the newly discovered “Nisku Oil Trend” in oil-rich west-central Alberta, *and* the “Sheffield Project” in oil and gas-rich south-east Alberta.
- Its stock, currently averaging just \$2.50 a share— is, by all calculations, ridiculously under-priced—but that will change—**SOON!**—so grab as many shares as you can **NOW!**
- This is a classic **QUICK** and **EASY** money play—fundamental and technical analysis is a waste of time here. It doesn’t matter if chimpanzees are running this company—because just one small fraction of its entire proven oil reserve can produce over **4 BILLION** barrels in a relative heart beat!
- Because the greed of Big Oil is unquenchable—because the entire world needs, craves and depends on new sources of oil now more than ever—GGSIF’s price will go ballistic as the price of oil skyrockets above \$100 a barrel!

Now if you’re not a trader—if you’re scared to pull the trigger—if you don’t live for the thrill of the hunt and the **KILL**—put this alert down right now, and find something safe to do, like knitting a sweater. Because I’m moving ahead with this play...

The track record promises riches!

My long-time subscribers know when I say buy, you immediately drop what you're doing, you allocate funds and you pull the trigger... and the profits follow—but only when you act *FAST!*—'cause there's no time to lose, no time to hem and haw or consult with oracles when I say *BUY!*

For example, in the oil sector alone, in the past 18 months, I said *BUY!* and...

- **Strata Oil & Gas** (also in Alberta)—its shares skyrocketed from less than a buck to \$7.95—a massive **783% gain in just 4 months!** (The stock has since split twice! and announced a major 2-billion-barrel petroleum discovery.)
- **Houston American** (another small independent)—its shares shot up from \$1.75 to \$8.05—a spectacular **360% jump, again in just 4 months!**
- **Dune Energy** (still another small independent). I said *BUY!* and its price **popped 96% in just a few weeks.**
- **Oilsands Quest**, (again in Alberta) with huge oil-sands deposits, **shot up 132%—just 66 days after I said BUY!**
- And if you don't mind waiting 6 months to nearly quadruple your money... tiny **PetroSearch Energy** exploded from \$0.39 to \$1.85 for a **juicy 374% gain after I said BUY!**

Now, I'm saying *BUY!* **Giant Oil & Gas!**

Why Smart Money says Giant is a hi-grade, profit-rich "GOLD MINE"!

Look at the map of Alberta, Canada to the right. [insert graphic]

Notice what happened to the 6 companies (lettered A thru F) surrounding Giant's 20,000+ acre oil and gas holding in the Tomahawk/Highvale area of west-central Alberta (which includes 5,000 acres in the recently discovered oil-rich "Nisku Oil Trend").

A. **Kick Energy Corporation**—bought by **Highpine Oil & Gas**. Price tag: **\$310 million.**

B. **White Fire Energy Ltd.**—also bought by **Highpine Oil & Gas**. Price tag: **\$99 million.**

C. **Vaquero Energy Ltd.**—also bought by **Highpine Oil & Gas**. Price tag: **\$350 million.**

D. <insert company name>, a wholly-owned subsidiary of **Imperial Oil/ExxonMobil**—bought by **Arc Energy Trust**. Price tag: **\$462 million**.

E. **Find Energy Ltd.**—bought by **Shiningbank Fund**. Price tag: **\$443 million**.

F. And just recently, **PrimeWest Energy Trust**—bought by **Abu Dhabi National Energy Company**. Price tag: **\$5 BILLION!!**

Over \$6.5 Billion paid to buy land circling Giant Oil and Gas

Now it doesn't take a genius to see that Big Oil is drawing a big fat bull's eye around GGSIF's oil and gas holdings in the Tomahawk/Highvale **7.8 BILLION** barrel oil deposit.

Mark my words: a deep-pocket buyer will scoop up Giant! The price is probably being negotiated as I write this—that's why I say there's no time to waste! If you buy the stock now at just around \$2.50—*imagine how much money you're going to make when the company is eventually sold!*

But since Wall Street is not stupid—its price will be going up even before a buyout deal is disclosed—so act **FAST!**

Sitting rich in the heart of a \$48 BILLION EMPIRE!

Now get this: Giant recently acquired, practically stole, another 5,000 acre block of prime energy real estate (the "Suffield Project") in the heart of one of the largest gas fields ever discovered... a vast reservoir in south-east Alberta covering 13,500 sq. miles—*more than twice the size of Connecticut!*

This natural gas bonanza is generally accepted to contain 20 Trillion Cubic Feet of natural gas. And the largest independent natural gas producer in North America—Encana, Inc., with revenues of \$16 billion and a market capitalization of \$48 billion—is already drilling there. But, they're not alone...

Sitting right smack in the heart of Encana's massive 4 million acre block is—yup, you guessed it—Giant Oil & Gas.

Like I said, it doesn't take a genius to figure out what could happen next...

Wall Street will wake up shortly to an oil miracle of seismic proportions

Now get this, too: Giant, using state of the art and previously unavailable 3-D seismic imaging in combination with advanced geological mapping techniques, is now able to achieve a record-setting 55 per cent success rate in locating productive oil pools in the Nisku Oil Trend—which Wall Street titan, Tristone Capital, already calls “the source of the most significant series of light oil discoveries in the past five years.”

And since Giant’s oil wells in this 5,000 acre parcel can churn out **one million barrels** over a three-year period—by the way, that’s a gross value of \$100 million **PER WELL** at today’s oil prices...

And since Giant can easily fit 32 wells in this 5,000 acre parcel, with plenty of room to spare—because 32 wells is just an industry average, certainly not the maximum for that size parcel...

And since the Nisku Oil Trend is an above average oil reservoir—we’ll increase the amount of wells it can comfortably situate there by a very conservative 25%—for a total of just 40 wells.

Now, let’s do the math: 40 wells producing 100 million barrels of oil (40X100 million) equals 4 BILLION barrels of oil, now multiply that by the current price of oil per barrel, which is \$100 (4 billionX\$100) that equals a whopping **\$400 BILLION** worth of oil—just from Giant’s Nisku Oil Trend alone!

Now do you honestly think that Giant’s stock is going to stay at less than \$3 a share for very long?

And do you honestly think that once some trader on Wall Street figures out what I just told you—that the stock will stay at less than \$3 a share for very long?

And do you honestly think that when this special alert—which you’re reading right now—starts circulating, that the stock will stay at less than \$3 a share for very long?

Giant is a 10-20, possibly even a 30-bagger, if ever there was one!

Big Oil is already looking to scoop Giant up—and the sooner the cheaper!

How can I say it any louder, and with any more confidence: **BUY GGSIF NOW!**

Why am I giving you this HOT BUY recommendation—for FREE?

Well, it's not free—at least I hope it won't be...

Listen, other newsletter editors and publishers might try and con you into subscribing to their investment newsletter by dangling a stock—*an unnamed stock*—in front of you. And only after you pay to subscribe—will they then give you the name of the stock they want you to buy.

Well, I'm giving you the name of the stock first! **BUY: GGSIF**.

And, unlike investment newsletters, which fill your email box with stock picks every week—more than half of which lose money—I will only alert you to sure-fire profit-multipliers—which don't come very often, certainly not every week. But rest assured—when I do uncover a winner—I guarantee you'll be the first to know!

Just as I'm doing right now. **BUY: GGSIF**.

And after you deposit the mega-profits you're going to realize from that trade—do me a favor, subscribe to my *Jake Landon's Elite Stock Report*—and make even more money!

Sincerely,

<Signature>

Colin McCabe, Editor
Elite Stock Report

P.S. I've enclosed a subscription request form, which includes a list of **5 FREE Bonuses and a Discounted Offer**—all yours once you join *Jake Landon's Elite Stock Report*. But first, **BUY: GGSIF** and see for yourself the value of my investment advice.
