

“Extremely amazing returns”—University of Chicago Graduate School of Business (see page XX)

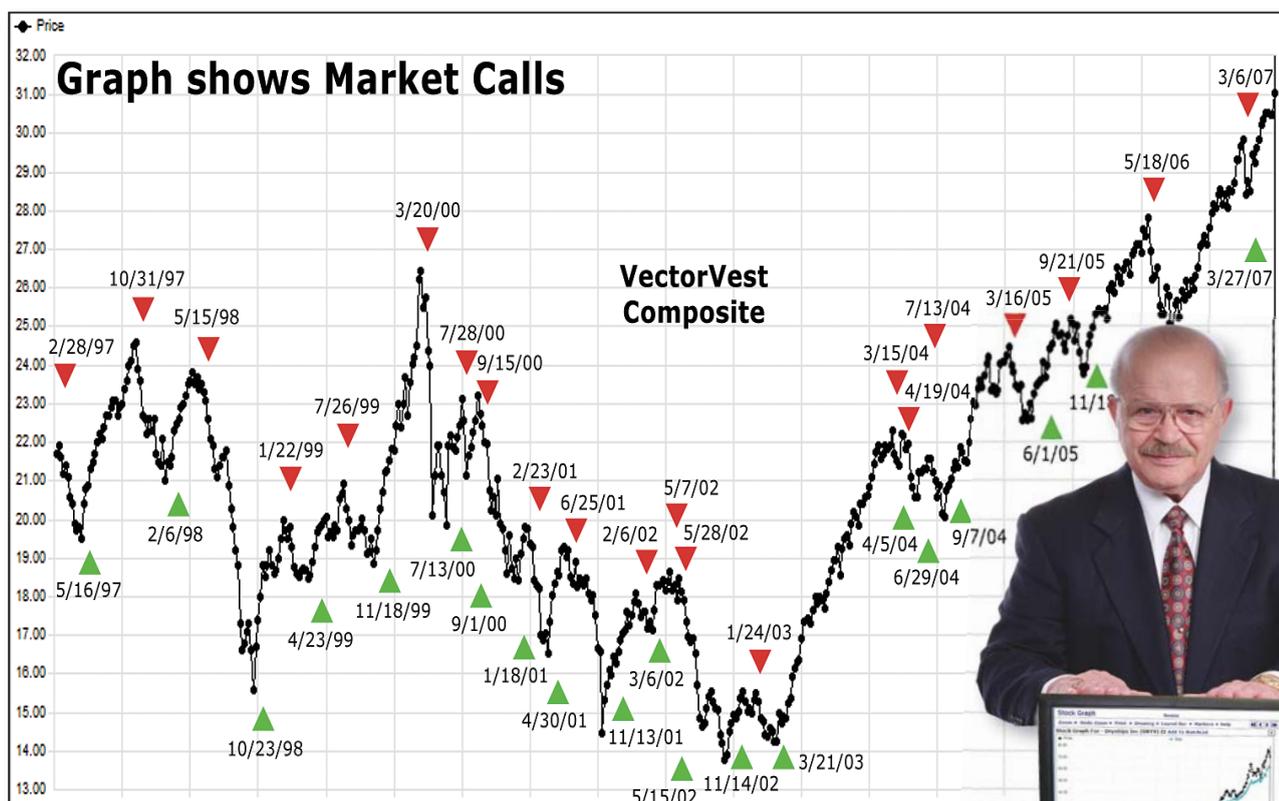

“Beat the market. ANY market. ANY time!”

“You will make money with VectorVest. That’s my promise to you.

“No matter what kind of market you’re in.

“No matter which one of these 9 investment strategies you use...”

—VectorVest® founder
Bart A. DiLiddo, PhD

Being on the wrong side of the market is the worst thing that can happen to an investor. It doesn't have to happen to you. VectorVest has signaled every major market turn since 1991.

Bart DiLiddo, PhD

INSIDE:

Discover 9 profit-making strategies for all sorts of investors including:

Aggressive Traders— Get in and out of a trade fast. VectorVest spots key changes over specific time periods for profits of 231% in just 13 weeks. (See page 11)

Speculative Traders— Plunder the market with a strategy I call Buried Treasure. The risk is greater but the return could be more than 750%. (See page 12)

Natural Resource Investors— With VectorVest you would never have missed the Uranium boom. Oil and gas, gold and silver—now you can profit from the next spike in natural resources. (See page 16)

Conservative Investors— Safely enjoy worry-free profits within your comfort zone and see annual returns of 88.45%. (See page 10)

Retirement Investors— Keep your nest egg growing with safe investment strategies that easily beat the rate of inflation. (See page 17)

Options Traders— Trade options with greater confidence and accuracy—while you enjoy 20% to 40% returns. (See page 15)

Short Sellers— Discover the secret to effortlessly beating a bear market by 312% or more. (See page 13)

Long-Term Investors— Imagine patiently turning a \$100,000 investment seed into a \$15,795,644 payday—and do it in just 8 years. (See page 9)

ETF Investors— Imagine seeing an impressive 53.60% return on your investment in just 2½ years—with an amazing 94% winning trade ratio. (See page 14)

It's easy to make huge profits with VectorVest. Try it **RISK FREE** for 5 weeks and see for yourself! (I'll tell you how inside!)

“VectorVest has scored huge profits in Bull and Bear markets.

“It’s made spectacular gains for every type of investor.
“It will make money for you too!”

Meet the genius behind VectorVest®... Dr. Bart DiLiddo!

Dr. Bart DiLiddo is one of the foremost investment experts in the world and the developer of the highly effective VectorVest system—which consistently beats those stocks picked by the “pros.”

Dr. DiLiddo isn’t a broker, an analyst or a stock market prognosticator. He’s a trained mathematician with a PhD from Case-Western Reserve University and a graduate of the Sloan School of Management at MIT and a Fortune 500 business background. He knows mathematics...and he knows business.

For the last 30 years, he’s used his unique combination of business experience and mathematical expertise to develop powerful formulas to analyze the performance of individual stocks, measure their risk, and identify market tops and bottoms with almost foolproof accuracy.

Thousands earn double- and triple-digit profits!

Thousands of successful investors all over the world rely on his VectorVest formulas to help them lock in double- and triple-digit profits year after year in both good markets and bad

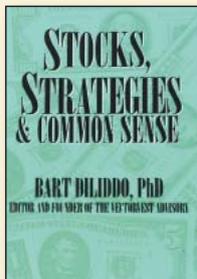

VectorVest’s track record of astounding success stems from Dr. DiLiddo’s belief that mathematics could be used to analyze the performance of the stock market and of individual stocks.

“If you study the right indicators, history patterns and numbers behind a company,” says Dr. DiLiddo, “it will give you a great advantage and insight into its potential success or demise.”

The Wall Street Journal names Dr. DiLiddo a winner!

A winner of *The Wall Street Journal’s* “Dart Board” stock selection contest, Dr. DiLiddo writes for *Investor Alliances* magazine and is a regular speaker at American Association of Individual Investors meetings, *The Money Show* and other investment conferences and financial forums.

Keep reading to discover more about VectorVest and how you can get a **FREE** copy of Dr. DiLiddo’s book, **Stocks, Strategies & Common Sense**. This must-have book is fast becoming the seminal book on investments.
See page 19 for all the details.

VectorVest is so simple a beginner can quickly find winning stocks!

Take a look at what VectorVest users have to say...

Bad market, over 100% profits

“Since September 2001, I am pumping gains at an annualized rate of roughly 200% in my margin account and roughly 100% in my IRA. I cannot sing the praises of VectorVest enough.

“Not only has it allowed me to quit my job as a residential contractor, but it has helped to educate me about the market.” —R.S., St. Augustine, FL

No longer guessing

“I recently used parameters which produced over 2,000 choices, made a watch list and refined that to 4 or 5 usable stocks, all in less than 5 minutes...I don’t know how anyone can

beat that.” —A.H., Portland, OR

Don’t know how to do it all on your own? Get the moneymaking help you need online at VectorVest University!

Many investors use only the most basic strategies—and start immediately. Others want more advanced strategies.

So imagine having a personal instructor to walk you through all the advanced moneymaking tools you’ll find in VectorVest.

With VectorVest University, you’ll have an online narrated tutorial to help you get started fast. It’s the best way to learn at your own pace the ins and outs of VectorVest’s advanced array of stock analysis tools—and how to use them to make more money.

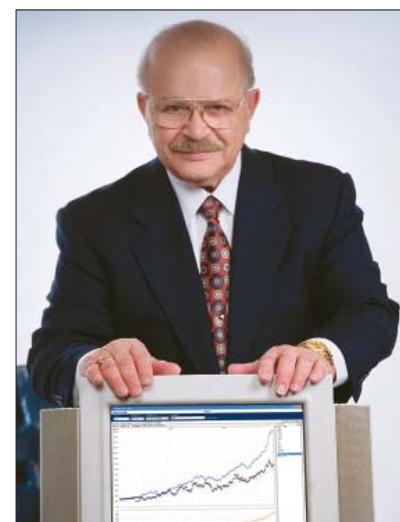

VectorVest University was created to help train you step by step in progressively more advanced strategies. You’ll quickly mature from beginner to expert executing more advanced strategies for building wealth.

Data about stocks, industry groups, and business sectors was current as of the first publication of this report. Since market conditions often change quickly, investors should not make investment decisions based on information contained herein, but should obtain updated data. “You can find winning stocks in less than 20 seconds with any of the 9 proven VectorVest investment strategies revealed in this report.

And you don’t have to be a computer expert to do it.”

**Now you can test VectorVest yourself...
RISK FREE for 5 WEEKS...with this exclusive,
limited-time offer**

Dr. Bart DiLiddo, breakthrough creator of VectorVest. It’s the most advanced, online market-timing system today—and yours to try FREE.

You’ve probably read about the remarkably accurate new VectorVest stock picking system—online service that already is helping thousands of investors beat the market by a huge margin year after year.

Yet it’s so easy for you to use that, with just a couple of mouse clicks you can find winning stocks—some of them deeply discounted from their current market value.

If you want to make double- or triple-digit profits in 2007 and 2008, you can’t afford to be without VectorVest. Put it to use at any time and you’ll have an advantage over every other investor...no matter how experienced, no matter how savvy they are.

Plus VectorVest includes a market-timing model that has never failed... and never will!

Bart A. DiLiddo

Bart A. DiLiddo, PhD

Dear Profit-seeking Investor,

92%!

That’s turning \$100,000 into \$192,000—almost doubling your money in 1 year.

In 3 years you’d be up 707%—\$707,788.80.

And in 5 years, 2,609%—\$2,609,192.63.

And you’d be earning these spectacular returns in both good markets and bad.

I’ll tell you all about the system methodology that produced these amazing returns in a moment.

But first let me show you how easy it is to find winning stocks using my VectorVest system. Let’s start with the easiest strategy—the VST screen.

Once every 6 months, on the 1st of January and the 1st of July, simply open VectorVest on your computer and then click the Stock Viewer

VectorVest will then instantly show you a full list of stocks with the highest ratings in terms of Value, Safety and Timing.

All you do is buy the top 10 or 20 stocks and then sit back and watch them rake in big profits for you. After six months has past, repeat the process and replace any stock that isn’t still on the VST Strategy list. It really is that simple.

And profitable, too—raking in 92% profits over the last year. And this is the easiest strategy among the many I’ll be telling you about in a moment. These are the kinds of

(Continued on page 4)

(Continued from page 3)

returns that can make you financially independent and more wealthy, so you can live the kind of life you want without the worry.

VectorVest makes investing easier, safer, more profitable, and a whole lot more fun. At last, no more sleepless nights worrying whether or not your nest egg is safe... no more having to rely on brokers and TV hucksters for stock tips... and no more concerns about whether you'll have enough money when you retire.

As one subscriber wrote me...

"I want to thank you and VectorVest for building my portfolio value beyond what I thought was possible entering my retirement. My portfolio value—all equities—stood at \$534,372 at the close of the year...its current value is \$890,290." — P.M., Midland, TX

What's more fun than making money? Having fun and making money!

The heart and soul of VectorVest revolves around three powerful proprietary market indicators that are calculated daily on more than 8,000 individual stocks. And they're immediately visible every time you open VectorVest.

Here are the 3 pillars of investing success...

Pillar #1—Relative Value (RV). Deceptively simple but powerfully precise.

Relative Value tells you at a glance whether a stock is undervalued or overvalued. When VectorVest indicates that a stock's **RV** is above 1.00—on a scale of 0.00 to 2.00—then that stock is quite simply a better investment than AAA

Extra profit in this year's "Election Cycle"

The stock market goes up during the last 2 years of a presidential administration. It's a historical certainty. This is called the "Election Cycle."

Of course, it's no accident. It's the result of political forces working hard to boost the economy. A prosperous economy and a booming stock market virtually guarantee success at the ballot box for those in power.

In fact the last 2 years of the 41 election cycles since 1832 produced a total net market gain of 592% compared with a 79% gain of the first 2 years of these cycles.

Effectively analyzes the market climate

With VectorVest, you have the world's most advanced market-timing system that effectively analyzes the entire scope of the market climate—including those 2 years before a presidential election—to produce the most accurate investment recommendations on the planet.

Without question the best source

“Your advice and strategies show me how to make money, instead of losing it, in a down market. VectorVest is without question the best source for seeing the direction of the market, when to be long or short, and what stocks to buy or short.” — M.T., Brentwood, TN

corporate bonds. But when a stock's **RV** is below 1.00, you'd be better off buying bonds.

If you're a prudent value investor, this is the indicator to swear by!

Southern Copper (PCU) (10/3/2005) RV was 1.58 with a price of \$27.87, now the stock is \$93.35, an increase of 295%

Decker's Outdoor (DECK) (6/1/2005) RV was 1.62 with a price of \$23.66, now its \$88.20, up 272%

Perdigao SA ADR (PDA) (6/2/2003) RV was 1.61 with a price of \$2.98, now its \$36.93, an increase of 1,138%

Using RV, you'll be able to tell at a glance whether a stock is undervalued.

Pillar #2—Relative Safety (RS): This indicator tells you how safe a stock is.

If you're a conservative investor, you'll definitely want to keep track of a stock's **RS**.

On a scale of 0.00 (extremely volatile) to 2.00 (extremely safe), the Relative Safety indicator will tell you how risky or safe any stock you're thinking of buying truly is.

To determine the RS, VectorVest looks at a stock's price appreciation history, its historical price volatility, and also the consistency of its financial and operating performance. Its debt-to-equity ratio, its market cap, sales volume, length of time in business and its sales volume are also factored in to every stock's RS.

McGraw Hill (MHP) (6/1/2005) RS was 1.63 with a price of \$43.65, now its \$70.39, up 61%

Stryker Corp (SYK) (6/1/2006) RS was 1.52 with a price of \$44.31, now its \$67.14, up 51%

United Healthcare (UNH) (6/1/2004) RS was 1.60 with a price of \$38.61, now its \$70.39, up 81%

RS will definitely keep you away from extremely volatile situations and risky misadventures—protecting your portfolio from possibly devastating reversals and losses.

Pillar #3—Relative Timing (RT): This is my favorite. If ever an indicator could be called my pride and joy—this is the one.

Imagine being able to compare the price momentum of over 8,000 stocks with a single mouse click. Imagine how much better you'd feel about your investments—and how much more money you'd make, if you knew just the right time to get into a stock—and just the right time to capture your profits.

Well this powerful indicator is the best in the business for providing this type of essential information—information that can literally make you a fortune!

Quite simply, when a stock's RT is above 1.00, its price is in an uptrend. When the RT is below 1.00, the stock's price is in a downtrend. And when the price trend flattens

out, the RT returns to 1.00.

The Relative Timing analyzes, the direction of a stock's price movements, the magnitude of its price changes and the dynamics of these changes to determine whether or not a stock's price will rise or fall and how strong that price momentum will be.

In other words, the RT is an investor's peek into the future to help you build a more profitable stock portfolio!

TBS International Ltd. (TBSI) (5/4/2007) RT was 1.84 with a price of \$16.20, now its \$22.70,

(Continued on page 6)

Easy to use and completely customizable With just a click of a mouse, VectorVest can help you make a fortune

Imagine screening, sorting and graphing more than 8,000 stocks to find the profits you want in any market condition. It's easy with VectorVest. And if you can turn on a computer, you can make money with this powerful tool. Here's how.

VectorVest gives you more than 30 different customizable search fields. You can combine these search screens (up to 11 at a time) to hunt for the profits you're looking for.

And if creating a custom strategy from more than 47 million possibilities isn't your cup of tea, you can always sit back and take advantage of VectorVest's preloaded stock strategies.

You can use these strategies to look for stocks based on Relative Value (RV), Relative Safety (RS), Relative Timing (RT), Earnings-Per-Share (EPS), Dividend Yield, Growth Rate, Price, Volume, Sales, Industry, Sector, Market Cap and more.

With 30 search fields to mix and match you can create

exactly 47,286,724 different stock picking strategies!

It would take you well into the next century to run all those strategies. But VectorVest is designed to give almost limitless options to create and build the kind of fortune you want—no matter what kind of investor you are...

- » **Aggressive or Speculative Trader**
- » **Natural Resource Investor**
- » **Conservative, Long-term or ETF Investor**
- » **Retirement Investor**
- » **Options Trader**
- » **Short Seller**

Whether you're new to the market or a seasoned professional, you can make significant profits using the market-timing system and advanced stock selecting algorithms built into VectorVest.

You can also easily search, sort and graph among 40 different business sectors and 192 different industries.

And look at this...

You can even back test a strategy to see how it would have performed over the last 11 years.

VectorVest is without a doubt the most sophisticated stock analysis and market-timing tool ever created. But the beauty is how easy it is to use to make money.

Learn how easy it is to use and customize VectorVest in the **Online User's Guide** and **Instructional CD**—yours absolutely FREE with your No-Risk 5-Week Trial of VectorVest OnLine. **For details, see page 19.**

Foundation for all my investing decisions

“VectorVest has a leg up on everybody else because of the ability to graph any variable over time and because of the combination of having both fundamental and technical indicators. It is a wonderful screening tool. I love your program and make it the foundation for all my investing decisions. I have used it for less than a year but have completely altered my investment style as a result. With VectorVest I don't worry about what the market's doing. I read the signals and react accordingly.

“For example, on MMSI, I made 43% in about 5 weeks; BLUD 33% in 6 weeks; 21% on CACI in 7 weeks, and CPN 23% in 3 days.” —R.W.E., Redding, CA

(Continued from page 5)

up 40% Transcend Services (TRCR) (3/27/2007)
RT was 1.82 with a price of \$10.25, now its \$16.83,
up 64%

Sifco Industries (4/5/2007) RT was 1.94 with a
price of \$10.50, now its \$20.37, **up 94%**

For example, you can see at a glance that a stock with an RT of 1.58 has higher momentum than a stock with an RT of 0.86.

Use combinations of VectorVest indicators

You can use these three powerful VectorVest indicators by themselves or in conjunction with other parameters—such as P/E ratios and dividend yields. You can even combine parameters using mathematical operators. For example, many VectorVest users like to screen for stocks that have high RS values and super high earnings' growth rates.

I wish I could personally show you how easy VectorVest is to use.

And you'd then feel very comfortable buying any stock, ETF or option that passed all our tests of profitability. You'd

Absolutely the finest software I have ever used

“I subscribe to at least 10 “trading” newsletters and I also use TradeStation, MetaStock and TC2000. VectorVest is absolutely the finest trading software I have ever used. I've been trading stocks and futures for 40 years and developing Windows software for 10 years. I can appreciate the effort that goes into developing and supporting a software package like VectorVest.” —C.R., Denver, CO

feel confident that you would, in fact, make money. Not just gamble with it.

VectorVest takes ALL the emotion and opinion out of investing. The result? You buy ONLY based on fact, predictable historical patterns and accurate conditions and indicators.

VectorVest is based on 30 years of objective research. It maximizes the power of 11 years of historical data and has a computer algorithm so complex it accounts for every important variable that affects a stock's price.

Yet VectorVest is such a snap to use. It's graphical user

VST-Vector—the Super Indicator no investor should be without

The VST-Vector system blends a stock's RV, RS and RT into a single indicator. It's as close as you'll ever come to an investment guarantee.

It allows you to instantly find stocks with the best combination of value, safety and timing.

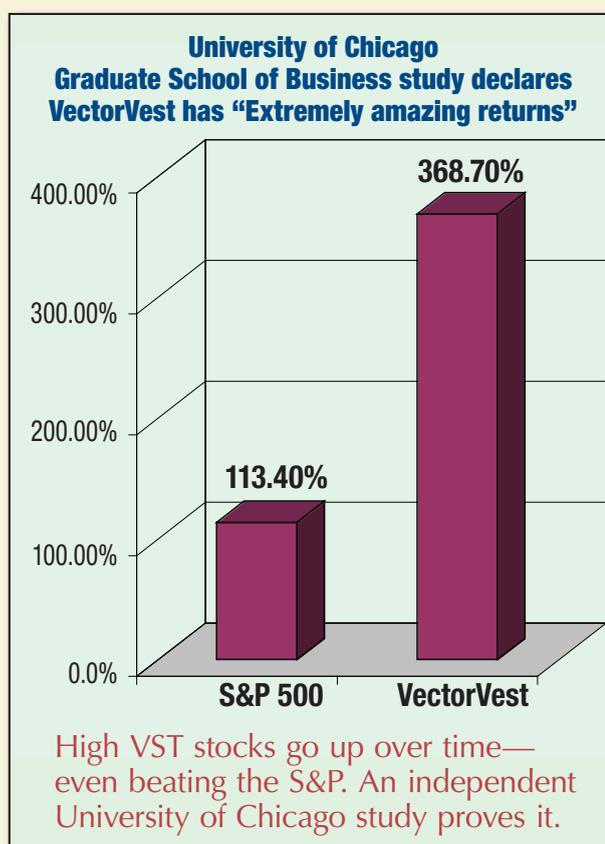

Just consider these 5 VST Super Indicator facts

FACT 1: High VST stocks have out-performed the market and mad money 95% of the time...no matter what the market is doing!

FACT 2: A 368.7% return in one of the worst bear markets. In early 1996, if you had purchased an equal dollar amount of the 10 stocks with the highest VST and then held them, you would have celebrated a 459 % return by July 2007. That's more than two times the return of the S&P 500.

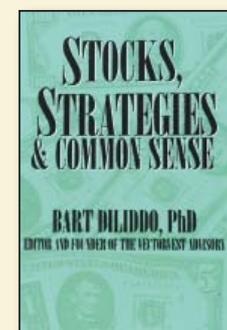

FACT 3: In addition to earning more than two times as much as the S&P 500, you would have experienced far less downside. During that 10-year period, your portfolio would have suffered only a minor drawdown in only 1 year, 2002.

FACT 4: The 20 stocks with the highest VST would have generated a stunning 326% return during that 11-year period—more than 1.4 times the S&P 500's 229% return!

FACT 5: High VST-Vector stocks go up in price. We went one step further to test our system. We ran the same systematic test with every starting date from January 5, 1996 to December 31, 2005 with a 5, 15, 20 and even a 50-stock portfolio. Overall, the average annualized rate of return was 171.41% per year, with 66% winners. No wonder it's called a Super Indicator!

Discover how you can start earning huge returns with a Super Indicator in **Stocks, Strategies & Common Sense**. It's a \$24.95 value—yours **FREE**—with your No-Risk 5-Week Trial of VectorVest OnLine. **For details see page 19.**

Or act now. Go online to www.TryVectorVest.com and get started today!

interface allows you to simply click your mouse button to work easily in the program. One click and the most up-to-date trading, history and market information appears right on your computer screen.

Watch your investment income zoom higher and higher

Let's look at another easy conservative strategy...

Want to see the size of your investment income skyrocket—while still shooting for higher growth and capital gains? Well that's easy enough...

Just plug into the power of VectorVest's **YSG** strategy.

I've already told you about our **VST screen**, using Relative Value, Relative Safety and Relative Timing. Well, meet its income-producing cousin—**YSG**.

YSG measures a company's Dividend Yield, Dividend

Safety and its Dividend Growth—using our quick and easy-to-understand 0.00 to 2.00 rating system.

It's hard to go wrong when you buy stocks with high **YSG** ratings.

The stocks that rise to the top using YSG are dependable companies that tend to stay out of the spotlight, but quietly increase their share values and their dividends at a steady pace. These are the kind of stocks that you don't have to worry and fret over.

Stocks like Kimco Realty (KIM), which had a 1.25 YSG. Kimco is the nation's largest owner of neighborhood and community shopping centers and had a 4% dividend yield.

YSG-Vector combines the best of all worlds...dividend safety, dividend growth and current income.

Just run the preloaded YSG strategy and VectorVest will

(Continued on page 8)

3 reasons VectorVest's Market-Timing Indicator has never failed...and never will!

No hunches. No guesswork. No emotion-driven forecasts. VectorVest's Market-Timing Indicator (MTI) is based on flawless mathematical logic.

These algorithms literally tell you when to enter the market at the beginning of a bullish run. Or tell you when to exit the market, when the market has topped out and the bears are on the prowl.

The MTI relies on 3 all-important variables...

1. The VectorVest Composite (VVC): This is an average price that represents all 8,000-plus stocks in VectorVest's database. It indicates the market's direction!

2. The VVC's Relative Timing (RT) Indicator: This signals a stock's short-term price performance. It's used to confirm the VVC's signal of an upcoming trend.

3. The VVC's Buy/Sell Ratio (BSR): This variable tracks the changes in the percentage of stocks receiving a Buy, Sell or Hold recommendation.

All this data is combined into a single easy-to-use, easy-to-understand indicator called the **MTI**. How does it work?

If the price of the VVC goes up 2 weeks without a downturn, this is an early sign of an uptrend. Another "up" move and it's almost certain. But we have to be sure.

Next, the VVC's trend is confirmed by the RT using a 0.0 to 2.0 scale. If the RT is above 1.0, then you have a very high probability of a sustainable market uptrend. Still, the algorithm is at work to be absolutely sure.

Confirms major market trends

So VectorVest uses the Buy/Sell Ratio that is also rated on a 0.0 to 2.0 scale. If it's above 1.0, you have absolute confirmation that the market has begun a sustained bull run.

It's important to note here that the MTI does not forecast sustained major market trends—**it confirms them!**

And because of its unwavering mathematical logic, it has never and can never fail.

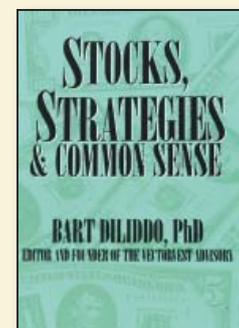

For more about this incredibly accurate timing tool be sure to read Chapter 20 in **Stocks, Strategies & Common Sense**. It's a \$24.95 value—yours **FREE**—with your No-Risk 5-Week Trial of VectorVest OnLine.

For details see page X.

Or act now and visit www.TryVectorVest.com and get started today!

Look at this snapshot of the most critical time in market history. You can see VectorVest's Market-Timing Indicator knew just when to get in and get out to make VectorVest subscribers a bundle.

(Continued from page 7)

screen, sort and graph all the companies in our 8,000-plus database—in less than 20 seconds—and then show you all the companies that can consistently and reliably provide you with an ever-ballooning income check.

That's money in the bank!

Now the story could end right there, if you're strictly an income investor. But there's still a lot more to be gained when you combine the two, the **VST** and **YSG**!

When you run this strategy you'll get a list of stocks that have the highest combination of value, safety, timing, dividend yield, dividend safety and dividend growth.

Now that's a combination any investor will love!

In fact, when I back tested this strategy over the last 11 years this is what I found...

Had you bought the top listed 10 stocks delivered by that strategy, VectorVest would have given you a whopping, safe and reliable 337% return on your investment over the past 11 years—enough to turn \$100,000 into \$437,665! And that doesn't include reinvested dividends!!

Back testing—peer into the past to see the future of your investments

You can literally take any search or strategy and back test it to see how it would've performed...had you bought stocks with that strategy 1 year ago, 5 years ago or even 10 years ago.

Back testing lets you peer into the past so you can see the future of every one of your stock investments.

VectorVest's back testing capabilities allow you to do exactly that. Just click a date in the pull-down calendar and you can find the stocks, industries or sectors that your strategy would have identified on that date.

Make your buying decisions easier with VectorVest Now you can effortlessly gauge a stock's true value

Every morning before the trading day begins VectorVest calculates two specific measures of value for the more than 8,000 stocks in its database.

The first is the **Relative Value (RV)**, which helps you see how one stock measures up against another.

The second is **Intrinsic Value**. This is calculated using a sophisticated discounted cash flow model that factors 16

different data points including account earnings, earnings growth, profitability, inflation and interest rates.

Stocks with an RV rating above 1.00 are undervalued

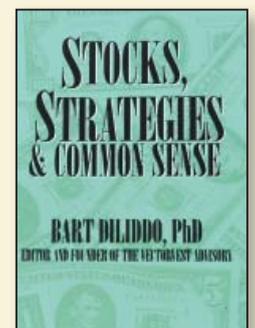

This means it has an above-average appreciation potential. Keep your eye on these stocks.

Sometimes a stock's RV will be above 1.00 even though its value is below its current price. This happens when a stock is selling at a premium—and futures earnings growth will drive the stock's price even higher.

Apple Computer (NASDAQ: AAPL) is a perfect example. Just recently Apple Computer was selling for \$121.33, which is clearly above its VectorVest computed \$95.76 value. However, VectorVest still gave it an RV of 1.34. That's because Apple is a particularly safe investment, as shown by its Relative Safety (RS) of 1.45.

This stability, coupled with Apple's impressive 25% per-year earnings growth, pushed Apple's RV above 1.00 way back on January 23, 2004.

Learn how knowing value can make you a better investor. Be sure to read Chapters 3 and 4 in *Stocks, Strategies & Common Sense*. It's a \$24.95 value—yours **FREE**—with your No-Risk 5-Week Trial of VectorVest OnLine. **For details see page 19.**

Had you purchased Apple in 2004—as VectorVest recommended—you would now be enjoying a 975% gain!

Or make money now. Visit www.TryVectorVest.com and get started today!

Then just click a later date and see how your picks would have fared had you bought and held them, from that point back in time, till the present.

The back-testing process takes just seconds, and could make you a lot of money, and save you from a lot of miserable losses! It provides you with feedback you need to fine-tune your strategy until it produces the results you want—with ZERO risk.

What a powerful and invaluable way to validate the potential moneymaking capability of any search you're

considering. And to test your current software.

You'll invest with confidence

Nowhere else, except through VectorVest, will you have at your fingertips such awesome power. The power to become an investing superstar. The power to make more money than you ever thought possible in the stock market. The power to feel in control and confident about your stock picks.

And one subscriber wrote...

"I am pumping gains at an annualized rate of roughly

(Continued on page 10)

Strategy #1—For Long-term Investors Easy, conservative strategy can earn profits of 143% every year

I've already explained the power of VectorVest's three proprietary indicators—RV, RS and RT.

Now, here's how you can combine these three indicators to create a long-term moneymaking machine—with a minimum of risk.

I call this strategy **High VST Newcomers**. It's just one of 200 preloaded strategies included with VectorVest.

When you run this strategy, VectorVest will instantly show you 10 stocks with the highest combination of **value, safety and timing (VST)**.

But what makes this strategy such a winner is the fact that unlike my more aggressive VST rankings, this screen selects only those stocks with a VST rating that has gone from less than 1.40 the previous week to above 1.40 for the current week.

Begin by buying the stocks that are returned with the High VST Newcomers strategy. Then, each week, for as long as you want to follow the strategy, you sell the stocks (if any) that have triggered a stop alert. Replace them with the newest High VST Newcomers stocks.

That's all there is to it... and it takes less than 20 seconds

I ran a High VST Newcomer test starting on March 27, 2007 (the start of a VectorVest-confirmed uptrend in the market) and ending on May 9, 2007.

In just about 5 weeks, the strategy delivered a total return of 16.93%—which is an annual rate of return of over 143%. Not bad for a very conservative strategy!

Profits are passing you by if you don't act now. So try VectorVest in your home for 5 weeks **Risk-FREE**. For details see page 19.

Or act now and visit www.TryVectorVest.com and get started today!

Dr. DiLiddo's strategy delivered a return of 143%

Sorting and screening tools have helped me make over \$534,372!

"I've been using the VectorVest system with positive results for 10 years. Upon my retirement, my portfolio was strong—with all equities—around \$534,000. Within the last several years, I've enjoyed a 140.7% profit. My portfolio value—all equities—stood at \$534,372 at the close of 2001. Its current value over San Juan Basin (SJT) alone gained \$373,120. Have sold most since, and now at 83% cash, I looking for safe dividend producers. Your program's best attribute is sorting and screening equities by a multitude of categories. I'm a retired petroleum geologist. I don't believe I would have had knowledge of Petroleum Royalty Trusts if not for your program." —P.M., Midland, TX

(Continued from page 9)

200% in my margin account and roughly 100% in my IRA. I cannot sing the praises of VectorVest enough."
—R.S., St. Augustine, FL

Of course there are numerous other stock analysis programs on the market today. But none of them provides you with the depth and breadth of data, safety, flexibility and versatility that's available to you with VectorVest.

That's why VectorVest is the most popular, widely used trading software among professional traders and brokers.

Which means while many people are paying high commissions to brokers to place wise, moneymaking trades for them—and putting a lot of trust in their trading "genius" and expertise—often the real genius propping them up is VectorVest!

You see, nothing can beat VectorVest in terms of accuracy, timing, back-testing capability and sheer profit power!

VectorVest is the only program that analyzes more than 8,000 stocks plus 192 industries and 40 business sectors and tells which among them—on any given day, Monday through Friday—is a SELL...is a BUY...or even a HOLD. Only VectorVest does this for you.

Up 30% net in 5 months

“WWCA January 11 to March 4...57%. PXLW November 5 to December 4...45%. CTSB October 8 to October 30...42%. There are many more. Of course some losers as well. Overall I am up 30% net in 5 months and with the back-testing I have done riding the wave with my strategies for 2 years, I would have been up over 100% each year.”
—R.H., Nevada City, CA

What about your current holdings? What should you do now? What should you do next week? Next year?

Two reasons to first check VectorVest before you invest in anything again!

Reason #1: I know you probably already subscribe to a newsletter or online service. But what most (or all) of those services lack—even for the most active traders—is the deep numerical research needed to separate the winning stocks from the losers.

With VectorVest, you can easily double check the accuracy of stocks recommended by other sources. That's

Strategy #2—For Conservative Investors The lazy man's strategy for confidently earning 88.45% a year!

Every Friday I recommend a strategy of the week to VectorVest subscribers. Recently I offered a strategy I call **Summer Hiatus**.

This simple but extremely profitable strategy involves buying the 15 stocks that have the highest combination of **value, safety and timing (VST)**.

Dr. DiLiddo's strategy resulted in a cumulative return of 1,009.6%.

Then, you hold these 15 top-rated VST stocks until the first Friday in July of the following year. That's when you **sell all your positions** and go completely into cash.

When the first Friday of October comes around, you again buy the newest round of the 15 top-rated VST stocks. Repeat this year after year.

Had you begun using this strategy on the first Friday of January 1996 and ended the strategy on the first Friday of June 2007 you would have earned **an average annual return of 88.45% and a cumulative return of 1,009.6%**—enough to turn \$100,000 into \$1,109,601.94 with hardly any effort.

Summer Hiatus is just one of dozens of strategies you can try using VectorVest. And better still, I'll let you try VectorVest in your home for 5 weeks **Risk-FREE. For details see page 19.**

Or act now and visit **www.TryVectorVest.com** and get started today!

because VectorVest gives you instant, access to all the data you'll ever need on more than 8,000 publicly traded companies, with each stock rated by VectorVest's highly accurate VST ranking system.

If you've been burned by a bad recommendation, you know how lousy it feels. The good news is that you never have to go through that again! Now you can instantly test every stock recommendation against VectorVest.

Reason #2: Remember, VectorVest's market-timing model has never failed.

Many "experts" offer opinions all day long based on nothing more than hunches and guesses. But when you fail to evaluate stocks in a mathematical, non-emotional and unbiased manner, you're always putting your money at needless risk.

VectorVest will put you in the money. But I want you to see for yourself. Without any risk. Without any obligation.

Take VectorVest for a Risk-FREE spin and make all the money you want before you decide...

Because I'm so confident that you'll find VectorVest to be

Safe, vigorous returns

“VectorVest is priceless to me for locating the stocks with the most potential for safe, vigorous returns. VectorVest told me about NVR, and that stock returned 41% for me in 2 months. No one else talks about NVR. Ditto for NFI, another great performer for me.

“VectorVest prevents me from buying overvalued stocks. It is amazing how many of those are hyped by other analysts. I have passed on many stocks, which were recommended by other analysts but that didn't pass VectorVest muster and I missed out only on big losses.” —G.B., San Luis Obispo, CA

the best moneymaking investing tool you'll ever experience, I want you to try it—the full, complete version—absolutely **Risk-FREE for 5 weeks**, as my guest!

Take it for a spin, kick the tires, put it through its paces and see how much money you can make. Check out the stocks you already own and see if VectorVest rates them a

(Continued on page 11)

Strategy #3—For Aggressive Investors How you can find stocks ready to explode 200% or more in weeks

Does investment risk (and a promise of greater profits) get your heart racing and your adrenaline pumping? Here is a strategy that involves a little risk, but could pay-out spectacularly!

It's called **Trend-Setter**. Unlike strategies that screen for stocks that meet a certain combination of criteria at a particular point in time, this strategy looks for stocks that undergo certain changes over a period of time.

Simply rank the stocks by VST and price. (Don't worry, you'll get full instructions when you accept your Risk-FREE 5-week trial.)

VectorVest will give you a list of stocks that have bottomed out and are primed to explode upward. And because the stocks are ranked using both their VST and price, you'll find your best candidates at the top of the list.

Fine-tune your search any way you want

Suppose you prefer stocks of fast-growing companies. You could instruct VectorVest to only display stocks with an Earnings Growth Rate greater than 20% per year.

Now suppose you are only interested in stocks that seem to be gathering the attention of other investors. You simply tell VectorVest to display only those stocks whose daily volume increased during the last 2 weeks.

Using this strategy, many of the stocks you'll find often go up 100% or more in just a few weeks.

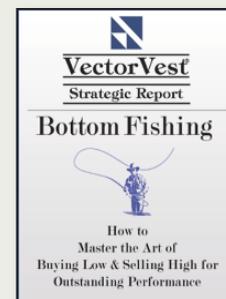

Here are a few examples...

CAS Medical Systems Inc. (CASM) closed at \$4.74 on September 30, 2005. Just 21 weeks later it was selling at \$14.06—a **196.6% gain!**

Sirius Satellite Radio (SIRI) closed at \$2.72 on September 10, 2004. Just 13 weeks later, it was selling at \$9.01—a **231.3% gain!**

Everlast Worldwide Inc. (EVST) closed at \$3.59 on November 26, 2005. Just 14 weeks later it was selling at \$13.12—a **265.5% gain!**

For more about finding low-priced stocks ready to explode read my Special Report, **Bottom Fishing: How to Master the Art of Buying Low and Selling High for Outstanding Performance**. It's a \$16.95 value—yours **FREE**—when you take advantage of this No-Risk 5-Week Trial of VectorVest OnLine. **See page 19 for details.**

(Continued from page 11)

BUY, SELL or HOLD—and view a full analysis—up to 106 customizable columns—on each stock you own.

No other online service gives you so many options, so much flexibility, so much insight, coverage, online help and analysis.

But don't take my word for it—see for yourself how powerful VectorVest truly is!

Try a No-Risk 5-Week Trial of VectorVest OnLine, the world's most accurate stock picking system, today.

And if at the end of the 5 weeks you don't want to continue using VectorVest—to make more money than you ever dreamed possible on a consistently safe and reliable basis—just stop using it. And you'll never hear from me again.

But I must ask you to do me one small favor before I grant

It's absolutely the best

“I've tried nearly every software program in the business...AIQ, Telescan, Super Charts, you name it. VectorVest OnLine is absolutely the best. I don't use or need anything else.”

—E.J.C., Naples, FL

you unlimited access to VectorVest. And I ask this solely because I don't want our computers to be swamped with investors who aren't seriously interested in VectorVest and my FREE trial offer.

I must ask you for a small—100% refundable fee of \$9.95. No that's not a misprint. And yes I know it's a small amount

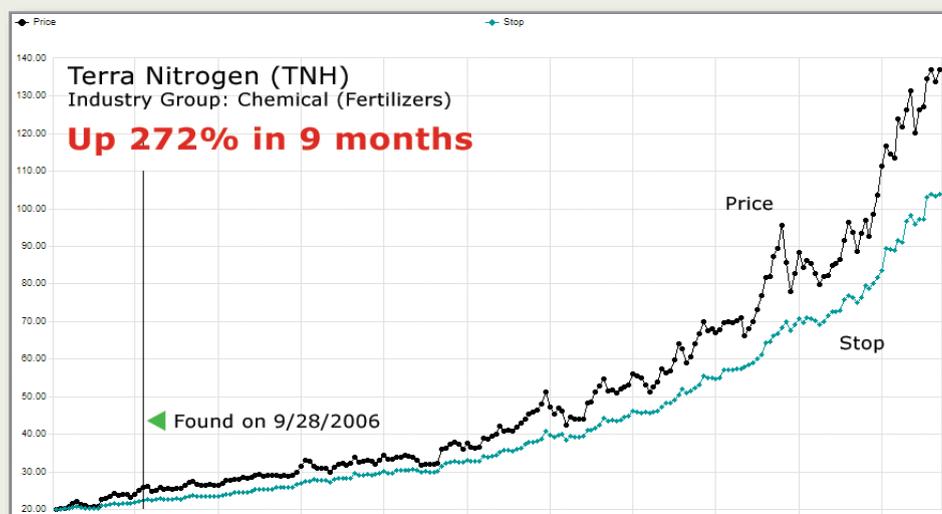

Strategy #4—For Speculative Traders 764.59%! Prospect for gold in your stock portfolio

Imagine pinpointing future performers in the early stages of a new price breakout—even in a terrible bear market.

That's the beauty of VectorVest's **High CI Prospects** strategy.

CI stands for Comfort Index and it measures a stock's ability to resist a severe or lengthy price decline during a down or bear market.

Here's how **High CI Prospects** works. You look for stocks that have been trading in a narrow range for the past 6 months but have only recently hit a new 52-week price high on volume that's at least 200% above its norm.

The Hi CI Prospector is an all-weather strategy designed to deliver powerful returns that you can double, triple, even quadruple your initial investment.

The stock must also have an average daily trading volume of at least 20,000 shares—because you want only fully liquid stocks.

After VectorVest has done its magic and returns a list of stocks that fit these parameters, view each stock's 1-year chart.

Go ahead and cherry-pick a few candidates

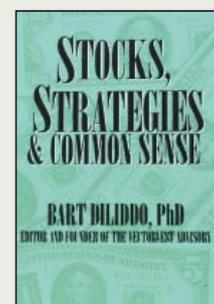

The first thing you'll want to do is click the "News" button on each stock and see why the volume is increasing and the price is rising. This way you'll eliminate any stock that's experiencing a temporary bounce on a one-time event.

Then, just place your best choices in your VectorVest WatchList to keep an eye on them for a while before you pounce.

This strategy has been back tested time and time again. To date our highest price gainer has already risen 764.59%.

To discover other strategies for weathering a bear market read **Stocks, Strategies & Common Sense**. It's a \$24.95 value—yours **FREE**—with your No-Risk 5-Week Trial of VectorVest OnLine. **For details see page 19.**

Or make money now. Visit www.TryVectorVest.com and get started today!

I'm 32% ahead

“I have been particularly successful using the strategies to find the best short positions to take. I am presently about 32% ahead on my activities this year using VectorVest programming.” —B.J., Carmel, CA

It's only a small fee, but believe it not, it will separate the wheat from the chaff—the truly qualified and interested investor from the mere window-shopper.

And as I mentioned, even that \$9.95 is completely refundable. You must be absolutely ecstatic with the stock picks VectorVest brings you and the money they make you. If not, let us know and your \$9.95 will be returned to you at the end of your No-Risk 5-Week Trial period.

And just to make it up to you for this hopefully minor inconvenience...

In addition to your No-Risk 5-Week Trial of VectorVest OnLine—but only if you register within the next 7 days—

(Continued on page 14)

of money. But \$9.95 will effectively dissuade (and tests have shown this to be true) all the nonserious “looky-lou’s” from clogging up our computers and phone lines.

Strategy #5—For Short Sellers

How you can make big profits with stocks guaranteed to fail

With VectorVest you can easily find stocks to short. But it also prevents you from shorting stocks that only look bad on the surface, but have hidden strengths that might allow them to bounce back before you have a chance to cover your short sale.

Here's how it works. You first want to sell risky, overvalued stocks short when they are going down in price. VectorVest's UniSearch Tool helps you find these stocks to sell short.

VectorVest also provides a Stop-Price on every stock in its database. This Stop-Price is designed to serve as a guide to help you cover stocks that are short as well as selling stocks that are long.

Let me recommend a tried and true shorting strategy for experienced short sellers as well as novices to try. It's called **Seto's Hook & Sinkers** (please don't ask why, it's a long story—but more importantly, it works like gangbusters!)

Here's what to look for

- » Stocks priced at or above \$10 a share.
- » Stocks that carry VectorVest's Sell recommendation
- » Stocks that have a GRT (a company's Growth Rate) of less than 0—which means the company has a negative annual earnings
- » And stocks that of course have the lowest RT (Relative Timing)

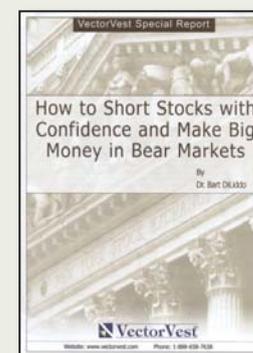

In a matter of seconds, VectorVest reveals a full list of stocks, with the worst (that is to say the best shorting candidates) appearing at the top.

Name (Symbol)	Price	Value	RV	RS	RT	VST	GRT	Profit in 2 months
Pozen Inc. POZN	12.53	1.43	0.12	0.86	0.52	0.60	-6	44.4%
Northstar-Neuro NSTR	15.75	4.74	0.37	0.37	0.81	0.58	-4	30.1%
Novogen Ltd. ADR NVGN	12.14	1.93	0.18	0.70	0.60	0.56	-7	21.9%
Radware Ltd. RDWR	16.03	7.53	0.54	0.76	0.68	0.67	-5	19.3%
Nanometrics NANO	12.35	8.02	0.64	0.93	0.74	0.78	-8	19.2%

You would have enjoyed a 19.2%–44.4% profit in 2 months by using VectorVest's shorting strategy.

Want to try short selling? Read my Special Report **How to Short Stocks with Confidence and Make Big Money in Bear Markets**. It's a \$16.95 value—yours FREE—with your No-Risk 5-Week Trial of VectorVest OnLine. **For details see page 19.**

Or start shorting now! Visit www.TryVectorVest.com and get started today!

\$3.5 million!

“I have made \$3.5 million shorting stocks; most were chosen on VectorVest. I followed your advice and it paid off. I have done considerably better than my friends and associates.” —D.J.M., Detroit Lakes, MN

FREE Gift #3: My Special Report, *Bottom Fishing: How to Master the Art of Buying Low and Selling High*

Strategy 6—For ETF Investors

Beat the pants off the market with Exchange Traded Funds

33.15%
with prudent,
conservative
ETFs

An Exchange Traded Fund (ETF) is a security that tracks an index, commodity or basket of assets, but trades just like a stock.

With an ETF you can diversify your investment risk with a single transaction—because ETFs allows you to take advantage of popular trends without having to select individual companies.

With ETFs you can easily buy stocks in emerging markets and take advantage of the economic boom in China, India, Brazil and other countries—without having to buy the stocks of individual companies (which can be difficult to buy and sell through U.S. brokerages).

So where do you begin?

Fortunately, VectorVest analyzes, ranks and graphs 500 ETFs on a daily basis.

And VectorVest offers you numerous preloaded strategy

The Best Performing ETFs strategy is an easy-to-use strategy for the prudent and conservative investor who wants double digit returns using only ETFs.

screens to help you find highly profitable ETFs.

VectorVest's **Best Performing ETFs** strategy looks for ETFs that it rates a BUY or HOLD. It also looks for ETFs with the highest combination of rising price momentum as well as the ability to resist severe or lengthy price declines.

VectorVest does all the work

Of course, VectorVest does all the hard work for you and tells you exactly which ETFs to buy now.

This strategy was tested over a 2½ year period from September 7, 2004 to February 15, 2007. Here's what happened.

I bought the top 20 ETFs that the **Best Performing ETFs** strategy returned. I then held these ETFs until VectorVest confirmed a down signal. And at that point, I sold all my positions and stayed in cash.

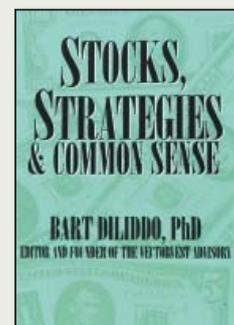

Then, when VectorVest gave me a confirmed up signal, I again bought the top 20 ETFs that the **Best Performing ETFs** strategy recommended.

All told, I bought into and sold out of my portfolio only six times in the entire 2½ years.

The result? A very impressive **33.15%** return. Not bad for a prudent ETF trading strategy!

For even more strategies, be sure to read *Stocks, Strategies & Common Sense*. It's a \$24.95 value—yours **FREE**—with your No-Risk 5-Week Trial of VectorVest OnLine.

(Continued on page 16)

Strategy #7—For Options Traders

You can trade options for big returns without big risks

Those who trade options are among the most enthusiastic users of VectorVest! Why? Because the information VectorVest puts at their fingertips dramatically reduces risk while boosting profits.

For example, you could buy Precision Cast (PCP) at \$100 per share. If you bought 100 shares, you have an \$10,000 investment. If PCP goes from \$100 to \$110, you'll have a 10% gain.

But suppose you had used your \$10,000 to purchase 24 call option contracts on PCP instead of the stock itself. At prevailing prices, you could have bought 24 contracts at \$404 each. Each contract entitles you to buy, or call away, 100 shares of PCP at \$100 per share anytime during the following 8 weeks. Your dollar investment is the same.

Look what happens when the stock makes the same \$10 move

Your call options are now likely to be worth about \$14,304, giving you a \$4,608 profit on your initial \$9,696 investment. That's a staggering 263.6% profit, rather than the 47% profit you would have earned by owning the stock itself.

Look at the actual return

By expiration the stock had moved from \$100 to \$119.51. Now the options are worth \$37,128, giving you a \$27,432 profit on your initial \$9,696 investment. This translates to a profit of 282%, compared to a profit of 19% had you purchased the stock.

You can achieve even better returns by screening for high-VST stocks that have an RT component greater than 1.50. These stocks are experiencing a particularly strong short-term upward price move.

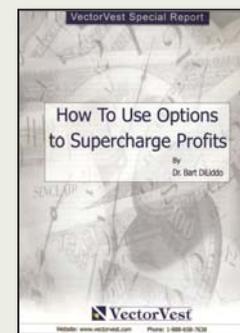

Buy call options

Buy call options on these stocks and you can frequently receive in days and weeks the same returns

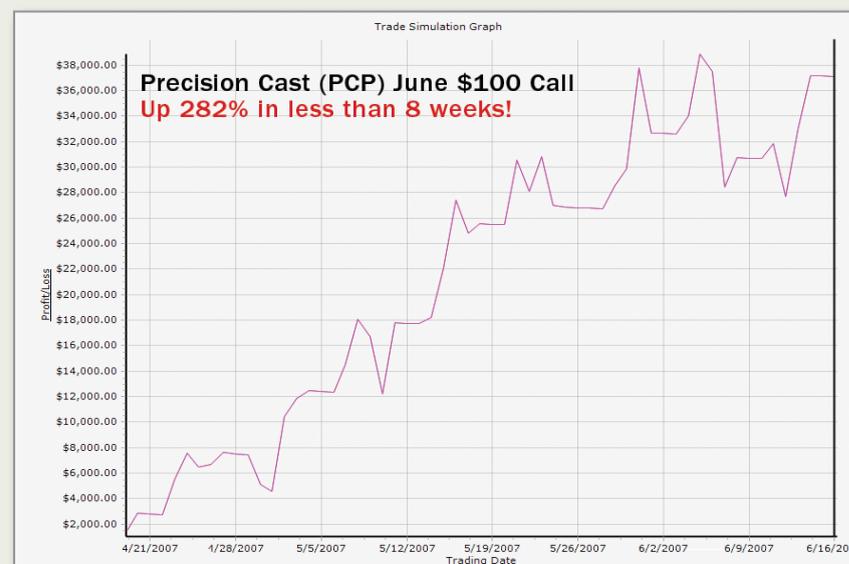

that it takes most other investors a year to get. One of our subscribers reports **annualized profits of more than 72%** using this approach!

In addition to identifying the best candidates for an option-buying strategy, VectorVest helps ensure you don't overpay for options contracts. It's built-in Black-Scholes feature instantaneously calculates the theoretical price for an options contract based on the price of the underlying stock, the contract's strike price and other factors.

For more about options read my Special Report, *How to Use Options to Supercharge Profits*. It's a \$16.95 value—yours **FREE**—when you take advantage of this No-Risk 5-Week Trial of VectorVest OnLine. **See page 19 for details.**

Or you can begin making money with options now! Visit **www.TryVectorVest.com** and get started today!

24 contracts of the PCP June \$100 Call would have been worth \$37,128 in less than 8 weeks, compared to a profit of 19% owning the stock.

(Continued from page 15)

value—yours FREE when you start your No-Risk 5-Week Trial of VectorVest OnLine!

Start now and you too will find winning stocks in less than 20 seconds because...

» No other program will analyze 8,000-plus stocks, 192 industries and 40 business sectors, and tell you which

among them—is a Buy, Sell or even a Hold.

- » No other program will tell you if the overall market, or any individual stock, is undervalued or overvalued, and whether or not the timing is perfect—and safe—to go on a buying spree. Only VectorVest will!
- » And no other software program has signaled every major market turn—up and down—since 1991—without

Strategy #8—For Natural Resource Investors
Confidently invest in natural resources and earn 564.74% in less than 4 years

Today's profitable resource stocks include gold, silver, copper, uranium, oil, natural gas, forestry, geothermal energy and more.

Take uranium...

With ongoing instability in the Middle East, and with energy consumption in India and China on a steady rise, uranium and the nuclear energy it offers has once again become a very important energy source.

But tight uranium supplies have driven the price of processed uranium up 927% since 2001.

VectorVest tracks over 2,500 stocks in VectorVest® Canada, 1,136 of which are natural resource stocks

As we go to press, a portfolio of the top-20 VST-ranked uranium stocks in Canada is up 564.74% since August 20, 2004.

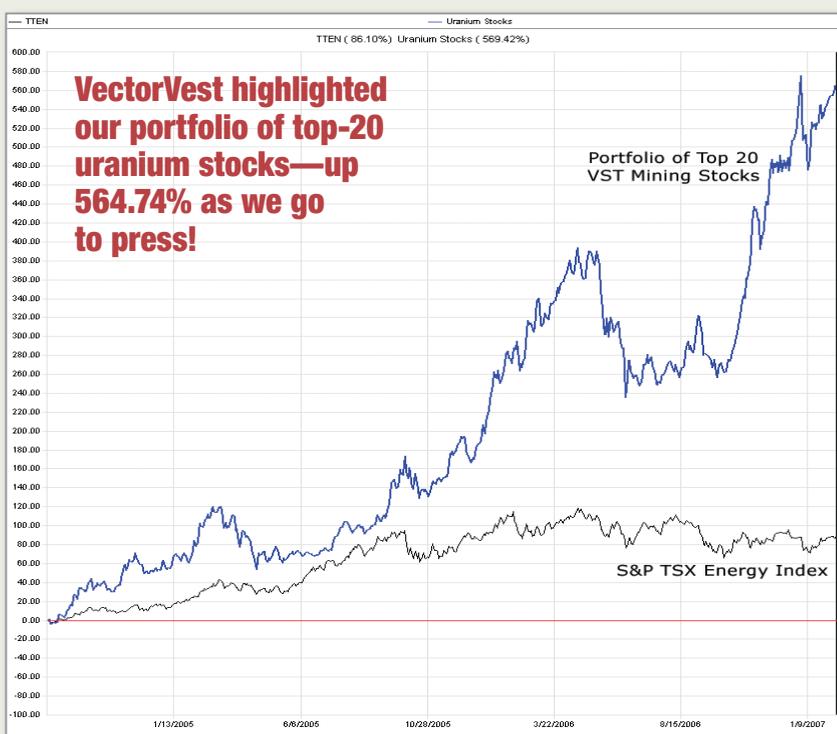

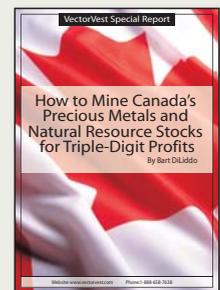

And if you look at individual stocks; Fronteer Development Group (FRG) is up 1,865% and Globex Mining (GMX) is up 626%.

Imagine...a \$10,000 investment in just these two stocks on August 20, 2004, would now be worth \$133,322.50.

In VectorVest® use the Canada Industry Group called Mining (Uranium) to follow the 101 uranium stocks VectorVest currently covers.

VectorVest® Canada is the only place you'll find daily access to side-by-side comparisons of 101 uranium stocks, 363 oil and gas stocks and 321 gold and silver stocks.

For more about how you can profit in mining read my Special Report, **How to Mine Canada's Precious Metals and Natural Resource Stocks for Triple-Digit Profits**. It's a \$16.95 value—yours FREE—when you take advantage of this No-Risk 5-Week Trial of VectorVest OnLine. **See page 19 for details.**

Compare for yourself. During the run-up in gold prices starting in June 2005, the stock for mining giant Gold Corp, Inc. (G) did 77%. But Canadian small cap mining company Solitario Resources (SLR) skyrocketed 150%.

fail. Only VectorVest has!

» No other software program will provide you with more than 200 preloaded stock screening strategies—preselected for every type of investor—enabling you to screen, sort and graph, stocks, ETFs, industry groups and business sectors—using 30 different customizable screening fields. Only VectorVest will!

VectorVest's highly regarded market-timing indicator—which has never once failed to predict a major market move—is showing me right now that the market is about to turn, yet again.

So if I were you, I'd want to immediately use VectorVest's impressive analytical tools to double-check my current portfolio's readiness to protect and increase my profits.

And I'd also want VectorVest to pick me some new positions—which could give me large short-term profits, in what bodes to be a very exciting near-term market.

Try VectorVest Risk-FREE—today!

Sincerely,

Bart A. DiLiddo, PhD.
Creator, Founder and Chairman of VectorVest®, Inc.

P.S. Remember, the VectorVest OnLine stock picking sys-

\$30,000 in 1 month!

“I invested \$50,000 on December 1 and made \$30,000 by January 2.” —J.C.S., DDS. Arlington Heights, IL

Well worth the price

“I made three purchases during my trial membership period that more than paid for the annual membership fee.”
—E.L., Jr., Faribault, MN

Nearly doubled my money in 2 months!

“I got the VectorVest software...and bought GG at about \$13 in mid-January and sold it at about \$17 in mid-March. DROOY was bought at \$1.50 in mid-January and sold at \$2.90 at the end of March.

“I definitely like to see my money almost double in 8 weeks!” —T.F., Honolulu, HI

tem is yours to profit from—completely Risk-FREE—for 5 full weeks—without risk or obligation!

“The best broker’s, financial planners and investment advisors in the country are using VectorVest!”

You can’t blame them! VectorVest is designed to help anyone make profitable decisions in any kind of market. It’s no wonder top investment advisors are using VectorVest to fatten their own personal fortunes.

VectorVest is indispensable!

“I use VectorVest literally for each and every trading decision. It is indispensable to my process. I am an investment advisor and associate portfolio manager with a large Canadian brokerage, and I use VectorVest to filter stocks for a portfolio I run for clients, which has been delivering very solid performance, especially since I began using your software in 2005.” **See page 10 for conservative investors!** —K.R., *Investment Advisor & Associate Portfolio Manager*

Vectorvest is the finest software of its kind!

“The user groups are an excellent means for newer subscribers to learn the practical and profitable elements of VectorVest. Sharing with others is the most credible learning experience. I personally believe that VectorVest is the finest database software of its kind and have stated that repeatedly, in formal presentations to large groups of individual investors.” **See page 9 for long term investors!** —H.G., *Pittsburgh, PA, Business and Investment Management Consultant*

The Only System I Would Ever Use!

“As a seasoned investment professional...if I found it necessary to rely on only one source, I would choose VectorVest because it combines many of the features—technical and fundamental—that other sources tend to focus on exclusively.” **See page 15 for option traders!** —J.P., *San Antonio, TX, Investment Professional*

Imagine knowing your broker is using VectorVest—when you could be easily using it yourself! Act now and try VectorVest for 5 weeks absolutely RISK FREE.

...and now you can enjoy the same kinds of sky-high profits by trying VectorVest absolutely Risk-FREE!
